SUMMARY

Product Builder with hands-on experience taking 0→1 products from discovery through execution, including an AI-powered personal memory product (Thenvue) and a creator commerce platform (Merchow). Combines product strategy, user research, UX design, and technical execution to turn ambiguous problems into intuitive digital products.

EXPERIENCE

• Thenvue 🔗*

Founder & Product Lead

2026 – Present

Remote / Mumbai

- Built **0→1** multimodal personal memory platform across Web and Mobile (Next.js & Expo), owning product strategy and UX architecture to deliver **2 production clients** from blank slate.
- Architected "**Ask Your Life**" grounded RAG assistant, combining **768-dim vector search** (pgvector) with metadata filters to trace **100% of synthesized answers** to verifiable source citations.
- Reduced perceived capture latency by **>95% (from ~2.5s to instant)** by decoupling client saves from background Gemini auto-tagging (topics, people, mood) and embedding generation.
- Engineered multimodal capture UX supporting **12,000-character entries**, photos, and voice notes with live waveforms, integrating Gemini transcription to eliminate journaling friction.
- Built historical photo rediscovery pipeline processing **50 photos per batch**, leveraging client-side EXIF/GPS extraction and date confidence heuristics to cluster past photos into moments.

• Merchow 🔗*

Product Lead (Founder-led team)

May 2025 – Present

Remote / Mumbai

- Led **0→1** product development of **Merchow.com**, defining the product roadmap, PRDs, and Figma wireframes while directing a **5-member cross-functional engineering team** across Agile sprints to MVP launch.
- Conducted **10+ creator discovery interviews** to identify monetization barriers, launching a store personalization module and dynamic earnings calculator that increased creator engagement by **35%**.
- Architected fulfillment workflows by integrating the print-on-demand API, automating **100% of order routing**, print coordinate mapping, and webhook tracking with zero manual overhead.
- Established an invite-only feedback loop with **20+ beta creators**, leveraging product analytics and client-side pre-flight image checks to resolve checkout friction and optimize storefront adoption.

• DHPP, SJVN

Operations

June 2024 – July 2024

Himachal Pradesh

- Reviewed **20+ component technical specifications** with senior engineers to verify operational compliance.
- Supported **5+ safety inspection rounds** across plant assets, ensuring workplace and regulatory standards.

SELECTED PROJECTS

• Escents Fragrance E-Commerce Platform 🔗*

Product / UX Design

Aug 2023 – Nov 2023

Web

- Redesigned product discovery with a sensory dark-themed UI and an interactive "**Find My Scent**" recommendation flow informed by user interviews, eliminating blind purchase hesitation.
- Drove a **5× revenue increase (Rs.10K → Rs.50K/month in 2 months)** by optimizing conversion funnel touchpoints and prioritizing high-impact UX enhancements based on customer behavioral feedback.

• All TET Previous Year Question (App) 🔗*

Product Lead / Interface Design

June 2022 – July 2023

Google Play Store

- Owned UI/UX strategy and Figma prototypes for an Android educational utility app, driving **10,000+ organic downloads** with a distraction-free, low-latency document reading interface.
- Analyzed app store feedback trends to define a targeted feature roadmap, optimizing core onboarding and navigation flows to reduce **user drop-off by 20%**.

EDUCATION

National Institute of Technology (NIT), Hamirpur

Bachelor of Technology in Mechanical Engineering

Sept 2021 – May 2025

Hamirpur, India

PROFESSIONAL SKILLS

Product Management: Product Strategy, Product Discovery, 0→1 Product Development, Roadmapping, Feature Prioritization, MVP Definition, User Research, Product Analytics, A/B Testing, PRDs & Acceptance Criteria

AI Product: AI Product Development, LLM Applications, Grounded RAG, Semantic Search, Prompt Architecture, Multimodal AI, Asynchronous AI Workflows

Design & UX: UI/UX Design, Interaction Design, User Flows, Wireframing, Prototyping, Design Systems, Figma

Tools & Technology: SQL, Mixpanel, Supabase, PostgreSQL, Git, Jira, Confluence, Cursor, Claude, Gemini, ChatGPT, v0
